PROFILE

I am a Full Stack Developer, specializing in building scalable and secure fintech applications. I possess strong problem-solving skills and am proficient in both frontend and backend development. My focus is on delivering robust, user-centric solutions, ensuring high standards of security and performance in the financial industry. I am proactive, adaptable, and constantly seeking new challenges to refine my technical skills.

EXPERIENCE

Full Stack Developer | One Consultant
December 2022 – Present
Client: Bancolombia (Fintech Solutions)

- Lead the development and implementation of product request flows in the bank's digital platform, improving customer experience and process efficiency.

- Managed and delivered key security solutions for banking applications, ensuring compliance with high-level security protocols and data protection standards.

- Collaborated closely with cross-functional teams to design and deploy cloud-based solutions using Azure and Docker.

- Actively contributed to CI/CD processes, improving deployment pipelines.

- Technologies: React, TypeScript, Node.js, NestJS, Kubernetes, Docker, Azure, PostgreSQL, MongoDB.

Full Stack Developer | Henry's
July 2022 – August 2022

- Developed a web application using PostgreSQL, Sequelize, Node.js, React, and Redux.

- Integrated external APIs for real-time data consumption, enhancing the functionality and data accuracy of the platform.
